---

## PERSONAL PROJECTS

---

### Portfolio – Github/jchik

Present

- Created my portfolio using latest technologies and practices: HTML5, CSS3, Bootstrap4.0, JavaScript
- Responsive Design
- Logos and Designs made on Inkscape
- Examples of SVG Animations for design layouts and loading screens

### TTC NextBus – Project on Github

June 2019

- HTML5/CSS3/JavaScript/jQuery/AngularJS/ Web Storage/Media Queries
- Personal project that displays approximate times that a bus arrives at a route and stop
- Reads JSON from *nextbusAPI* and displays info using jQuery and AngularJS
- Uses HTML5 Web Storage to store and remember pinned buses on the browser
- Uses Media Queries and responsive design to adapt to different media resolutions

---

## ACADEMIC PROJECTS

---

### HR Management – Database Connectivity using Java (CJV805)

April 2018

- HTML5/CSS3/Java Servlets/JSP/Bootstrap
- 2-person team project to create a JSP-Servlet Web Application that handles the management of Employees
- Allows HR to login to the system and manage Employees (Add, Update, Delete, Search, View)
- JPQL/Connection Pool technology to connect to the Database
- Coded using MVC modelling and OOP concepts

### Bank Application – Database Connectivity using Visual Basic (CVB815)

April 2018

- Visual Basic .NET/ASP
- Individual project to create a Web Application that handles Customers, Banks, and Transactions
- Allows users to register an account, add banks to the account, and commit transactions using ASP and SQL connectivity
- LINQ technology used to query from the Database
- Razor/HtmlHelper used for development of Web Pages
- Coded using MVC modelling and OOP concepts

### Client-Server Bank Application – Programming using Java (JAV745)

Dec 2017

- Java/Threads/TCP
- Individual project to create a Client-Server application that handles Account-Bank transactions
- Bank server can handle multiple connections using Multi-threading
- Coded using OOP concepts

### Product Management – UNIX/Linux and Internet Programming (ULI705)

Dec 2017

- HTML5/CSS3/JavaScript/PHP/MySQL
- 2-person team project to create a Website that handles the management of products
- Allows the user to View, Add, and Delete products from the Database using MySQL and PHP connectivity
- Verification of input done through JavaScript (Ex. existing product id, negative input, invalid input)

### Weather Network – Web Applications (CPS630)

Feb 2016

- HTML5/CSS3/JavaScript
- Individual project to develop a Web Application that would display the weather of a selected City
- Features display of current weather, 3-hour forecast, and the next five-day forecast
- Allows user to switch between Celsius and Fahrenheit
- Calls upon *openweathermap* API in JSON to fetch and manipulate data to display
- Responsive web design that changes upon resolution size using media queries
